PROJECT

MEDSERVE: As a mini project, my team developed an E-commerce website for medicine shopping. During the pandemic season, people who seek medicines can't approach offline medical stores. So through our project, we make medicines available online with ease and convenience.

Built on: HTML,CSS, BOOTSTRAP, PHP, MySQL

GR Website: GR Website is used as a preliminary step for screening candidates for beauty contest. The project make use of a universally accepted constant, GOLDEN RATIO to compare the symmetric face proportions. Face detection, face landmark detection and face mesh detection are also done for calculating the symmetric proportions. .The project make use of Python, Open-CV modules for face recognition and to calculate the Golden Ratio.
